Why Redan Medical!

*Redan Medical is a licensed Home Care Organization under Home Care Bureau of California Department of Social Services. All of our services are **bonded**, and are covered with general & professional **liability insurance**. We understand how delicate the task of caregiving to elderlies and people with special needs is. That is why we are proud to have a team of **highly skilled, enthusiastic, licensed caregivers** who live by the **passion** of giving to others and by the art of providing for fellow human beings. Our caregivers are **registered** with Social Services Home Care Aide Registry, and cleared with **background, criminal & drug/TB tests**, and most often than not, speak **multiple language**. Our caregivers are constantly up-to-date with their **trainings** by taking proper courses, attending seminars & workshops, and obtaining relevant certificates & licenses. As a measure of additional scrutiny, we have **supervisors** who rotate between the residences that we cater to, and check on the quality of the caregiving services. In addition to cater to all of your homecare service needs, we also supply you with all your **DME(Durable Medical Equipment)** necessities and services.*
